

# **Main Export Control Development Fundamentals in Ukraine**

Volodymyr Demiokhin

Cand. Sci. (Engineering)

Chairman of the State Service for Export Control of Ukraine

Kyiv – June, 2011

# It is envisaged to define in this presentation:

- **Philosophy** of further development of the export control system of Ukraine on the basis of the tasks set by the President of Ukraine Victor Yanukovich to state agencies
- **Fundamentals** of development of the export control system of Ukraine according to the fields of concern of the SSEK of Ukraine
- **Effect** resulted from improvement of the export control system of Ukraine

## **Tasks set by the President of Ukraine Victor Yanukovych to state agencies**

**Modernization of Ukraine including the sphere of economy and foreign policy**

**Increase of competitive capacity of the economics**

**European integration**

**Creation of advantageous business climate for entrepreneurial activities;**

**Radical fighting corruption**

**Deregulation**

**Collaboration with partner countries and international security organizations**

**Fulfillment of these tasks is a philosophy of further development of the export control system of Ukraine**

## Development philosophy elements

**Primary objective of the SSEC of Ukraine – promoting increase in export potential, providing the objectives of international security, nonproliferation and counterterrorism**

**The export control system of Ukraine has to become not a “constraining factor”, but *vice versa* a “catalyzer” of foreign economic activity**

# Development components of the system

## Promoting economic growth of the state

- implementing measures of “soft” deregulation
- creation of favorable conditions for national exporters
- promoting European integration
- transformation of a “rigid” control system into a favorable” for a national manufacturer system
- active protection of the interests of national manufacturers
- assistance in rising exporters’ standard of knowledge in the area of export control

# Components of the system development

## Implementing measures of “soft” deregulation

- transition from the “total control” principle to “necessary and appropriate control” principle
- decreasing the scope of control over negotiations
- analysis of the impact of “restrictive” measures of export control on the indices of the state economic growth
- reduction of the term for reviewing manufacturer’s documents
- adjustment of fee rates for issuing authorization documents
- extended provision of the information on state export control to public

## Components of the system development

### Creation of favorable conditions for national exporters

- providing the industry with counseling assistance concerning the essence of export control requirements
- providing equal playing field for enterprises of all patterns of ownership
- maintenance of the state monopoly on export/import of military goods
- rendering methodical assistance to industry concerning establishing and functioning of ICP systems
- phased transition to applications receipt using electronic format

## Components of the system development

**Improvement of mechanisms of the implementation of international obligations in the field of nonproliferation**

- ☐ **approaching the legislation to norms and procedures of EU member states**
- ☐ **efficient use of international experience in the sphere of nonproliferation and export control**
- ☐ **implementation of a “single” dual-use list on the model of European list**
- ☐ **timely and sequential implementation of the decisions of international organizations into national legislation**

# Components of the system development

## Activation of the work within multilateral export control regimes

- ☐ upholding national interests
- ☐ protection of legitimate interests of the national exporters
- ☐ improvement of mechanisms of the preparation for reviewing problems at international organizations level
- ☐ active cooperation with export control authorities of other states
- ☐ timely implementation of the international organizations' decisions into national legislation

# Components of the system development

## Assistance in rising standard of knowledge in the area of export control

- preparation and publication of training aids, reference books and comments on the export control issues
- implementation of courses of lectures on export control in specialized educational institutions
- arrangement of ongoing refresher courses on export control
- counseling and methodical assistance to enterprizes

## Effect resulted from improvement of the system

- Transformation of a “rigid” control system into a favorable” for national manufacturer model
- Creation of perfect mechanisms for promoting world peace and security
- Increasing efficiency of basic procedures for export control
- Rearrangement and simplification of the regulatory and legal framework
- Reduction of time for making decisions
- Cutting-down flow of documents
- Implementation of mechanisms of rendering assistance to national manufacturers

**Thank you for your attention!**
